### **DETAILED ACTION**

1. This Office Action is in response to the applicants' communication received on April 16, 2007.
2. Claims 1-24 and 26-38 are presented for examination.
3. The applicants have amended claims 1, 7-12, 14-18, 20, 23, and 24. The applicants have cancelled claim 25 and have added new claims 35-38.
4. Applicants' arguments with respect to claims 1-24 and 26-38 have been considered but are deemed to be moot in view of the new grounds of rejection.

### ***Claim Objections***

5. Claims 1, 7, 18, and 24 are objected to because of the following informalities:

Claim 1 is objected to because the claim does not comprise the steps of modifying the data that is suggested in independent claim 7. It appears that claim 1 should comprise the modification step that is presented in claim 7 in a way that would add consistency to the claim limitations of independent claim 1. Likewise, claim 1 should further include information that details what happens to the data assembly once the "making" the data assembly including redundant data available for distribution. Adding the specified detailed claim limitations would provide a concrete and tangible result (i.e., display, output, etc.) to the distributed component of the redundant data.

Likewise, independent claims 7, 18, and 24 should also conclude with a step that suggests in detail what happens to the data after "making" the data of the assembly available for distribution.

The remaining claims are dependent claims, these claims are also objected to because they are dependent on the above objected base independent claims.

Appropriate correction is required.
